In 2013, Honda began production of freshly designed K24W. It was an entirely new 2.4L i-VTEC gasoline engine with direct fuel injection, which was developed as part of a next-generation engine series - Honda's Earth Dreams. The K24W shares with previous K24 engines only the bore and stroke sizes. The overall design is completely different.

This issue was first brought up in the ETCG Forum by Sam, " Alright, I am seeking some advice. I have a 2012 Honda CRV with the 2.4 L engine. Roughly 86,000 miles. Has that famous VTC actuator grind noise after cold start up. It sounds awful for a second. I have talked to a couple of mechanics/service advisors.

The Honda K-series engine is a line of four-cylinder four-stroke car engine introduced in 2001. The K-series engines are equipped with DOHC valvetrains and use roller rockers to reduce friction. The engines use a coil-on-plug, distributorless ignition system with a coil for each spark plug. This system forgoes the use of a conventional distributor-based ignition timing system in favor of a ...
