Structural Holes vs. Network Closure, May 2000, Page 6 connections run through him. His score is the highest score in Figure 1, well-above average (47.0 is a 4.0 z-score), and much higher than James' 5.2 score, which is below average. Robert's bridge connections to other groups give him an advantage with

Structural Holes versus Network Closure as Social Capital

Economics. This chapter is about two network structures that have been argued to create social capital. The closure argument is that social capital is created by a network of strongly interconnected elements. The structural hole argument is that social capital is created by a network in which people can broker connections between otherwise disconnected segments.

Structural Holes versus Network Closure as Social Capital

Structural holes is a concept from social network research, originally developed by Ronald Stuart Burt. The study of structural holes spans the fields of sociology, economics, and computer science. Burt introduced this concept in an attempt to explain the origin of differences in social capital. Burt's theory suggests that individuals hold certain positional advantages/disadvantages from how ...

This paper seeks to provide a solution by integrating a culture-embedded rational model of action into the social network model of structure, using this not only to re-examine the closure versus structural hole debate, but also to tie it to the literature on Confucian capitalism and the "East Asian Model" of the firm.

Confucian Capitalism and the Paradox of Closure and ...

A structural hole is a gap between two groups in a social network. As I explained in that post, these gaps often provide opportunities for innovation. Burt argues persuasively that structural holes provide much of the value of social capital. The counterpart to "structural holes" is "network closure."

Connectedness: Reputation and Trust (aka "Network Closure")

The closure argument is that a network of strongly interconnected elements creates social capital. The structural hole argument is that social capital is created by a network in which people can broker connections between otherwise disconnected segments (Burt 2001).
